

Company:
EphaseGlobal Inc

4-Serv Services:
Managed Services/Cloud Native Development

Use Case:
Customer wants a partner who can manage their software application development and deploy applications into AWS Cloud.

Industry:
Healthcare

Campaign Name:
Digital Transformation

BUSINESS CHALLENGE

- Staffing technology teams with AWS Certified and Java Certified expert resources is very challenging.
- As a startup, the internal recruiting team is short staffed to hire these experts.

4-SERV SOLUTION

- We provide an end to end managed service solution
- We provide multidisciplinary pod teams.
- These teams deliver assigned user stories from ideation to development/ deployment and support.
- Technologies used are AWS Cloud Front, AWS Postgres SQL, AWS EC2, AWS S3, AWS Route53, AWS VPC, AWS ELB, AWS CloudWatch and Postgres SQL

RESULTS & BENEFITS

- Customer was able to successfully implement and manage software application in AWS cloud at half the cost.
